P a l o A l t o, California

Tel. 23.029; 29.038 - Indirizzo telegrafico: Istigenetica - Pavia

Dear Joshua,

to my previous list of engagements
please add that Sol Spiegelman will be here on
October 30 and 31 for a visit.

I had a letter from Di Girolamo who
is at present in Newcastle on Tyne 1 - Dept. of
Chemistry - King's College - telling me that he
is a little sceptical about his results on an in-
creased metabolism accompanying mating, because of
a difference in the physiological conditions of
the cells which he crossed (F- was stationary and
F+ was logarithm).

I have asked him to write you a short
summary of his results and let you know whether he
is going to continue the work or not. He will be
working with Gorini starting next month.

All the best

L.L. Cavalli-Sforza
